1. The following installations were either completed or put into operation in 1950:
 - a. One 2 KW stand-by transmitter each for Berlin and Dresden have been completed and are now in operation.
 - b. The tower on the Brocken Hotel has been completed with an ultra-short-wave antenna. Two short-wave and ultra-shortwave transmitters have been tried experimentally.
 - c. 15 special receivers have been built for radio stations at this time. The RFT was not in a position to complete these receivers and they had to be finished by a private firm in Adlershof.
 - d. One single-bank-receiver under interzonal agreements.
 - e. One panoramic receiver built by RFT.
 - f. Fourteen radio monitoring sets for radio receiving stations have been installed in Koenigswusterhausen, Bunlig, and Schwerin. There are two short-wave transmitters in Dangarten-Riebnitz which were formerly in the MPF in Berlin. Because of this, a reconstructed Wehrmacht transmitter is being used by Berlin.
 - g. Plauen, Reichenbach, and Schleusingen each have one 800 watt and two short-wave transmitters. The RFT is not in a position to complete the transmitter in Schwerin so that this transmitter can operate in the 200-600 meter band.
2. An undated letter from the Hauptverwaltung of the VP to the Plankommission of the DDR Ministry of Interior asks that 22,200 German marks be allotted for the completion of the telephone net of the northern border.
